
STREETLIGHTING

AVAILABLE

At locations on or adjacent to the Company's existing overhead primary distribution system operating at or below 12 kV. Primary distribution line extensions or extensions from underground facilities may be made to provide service under this schedule in accordance with the Company's Terms and Conditions.

APPLICABLE

To incorporated cities, townships, or other local governing bodies for the lighting of public streets, alleys, and thoroughfares in urban or platted suburban areas. This rate schedule is not applicable for lighting of any privately owned roads, drives, etc., for flood lighting installations, or to lighting of athletic fields, recreation areas, swimming pools, parking lots, and other similar projects either public or private.

STANDARD EQUIPMENT AND SERVICE PROVIDED

The Company will install, own, and operate the following items designated as standard equipment:

1. Standard fixtures will consist of light-emitting diode (LED). The character of the circuit (series or multiple) and the voltages supplied to the fixture will be determined by Company.
2. Standard overhead extensions shall consist of a properly sized pole and arm with a maximum of 165 feet of secondary circuit. Company may restrict installations of new facilities in areas without adequate property right-of-way, utility easements, or areas in which installation would increase costs due to access, terrain, or soil conditions, or alternatively the Customer may reimburse the Company the incremental cost above the average cost for a standard installation.
3. Standard underground extensions at the Company's discretion shall consist of a properly sized pole and arm, secondary cable, pole riser, and a maximum of 330 feet of secondary circuit from the Company's underground distribution system. Company may restrict installations of new facilities in areas without adequate property right-of-way, utility easements, or areas in which installation would increase costs due to access, terrain, or soil conditions, or alternatively the Customer may reimburse the Company the incremental cost above the average cost for a standard installation.

STREETLIGHTING

4. High pressure sodium (HP), metal halide (MH), and Mercury Vapor (MV) fixtures are no longer available for new installations. The decision to repair or replace HP, MH, or MV lamps with another type shall be at the Company's discretion.

MONTHLY BILL FOR STANDARD INSTALLATIONS

Charges equivalent to rates in the currently effective Master Tariff, plus applicable adjustments and surcharges including the Energy Cost Adjustment (ECA), Ad Valorem Tax (AVE), and Transmission Delivery Charge (TDC).

NONSTANDARD EQUIPMENT AND SERVICE PROVIDED

The Company, at its discretion and upon Customer's request, will install, own, maintain, operate, and supply energy to nonstandard streetlighting facilities or system which utilizes lighting components or otherwise exceeds the provisions of the standard streetlighting offerings as identified in this tariff. This includes underground conductor, excessive circuit extensions, special type fixtures, poles and controls, etc.

MONTHLY RATE FOR NONSTANDARD INSTALLATIONS

1. Standard components included as part of a nonstandard installation will be billed at the appropriate metered or unmetered rate.
2. Nonstandard components' rate(s) will be determined using the Company's lighting rate calculation methodology. Nonstandard components include poles, wires, lamps, labor, equipment charges, and all other installation costs.
3. The energy rate for nonstandard lamps calculated as the ECA value and the effective AVE and TDC at the date of the contract per kWh calculated on the basis of 4,000 hours of operation of both lamp and ballast at rated wattage per year and billed in twelve (12) monthly installments.
4. The total monthly bill will be the sum of the above three items.

AREA DEVELOPMENT

If the promoter, developer, or owner of a new development requests streetlighting be installed in the development as contemplated under the Area Development subsection of the Line Extension policy of the Company, the promoter, developer, or owner must first obtain written approval from the governing body responsible for payment of all lighting service charges after installation. The deposit required related to streetlighting will include the total estimated

STREETLIGHTING

installed cost of the fixtures, pole, conductors, conduit, controls, and related equipment. Upon initiation of monthly billing to the governing body for streetlighting service, the Company will refund to the promoter, developer, or owner that portion of the deposit not exceeding \$250 per light. However, the portion of the deposit exceeding \$250 per light is not refundable. All terms and charges shall be as specified elsewhere in this schedule and Master Tariff.

OTHER TERMS AND CONDITIONS

1. Standard fixtures available for installation hereunder will be determined by the Company on the basis of their quality, capital and maintenance costs, long-term availability, general Customer acceptance, and any other pertinent factors which, upon request, the Company will make available to any prospective Customer.
2. Nonstandard streetlighting will be installed at the Company's discretion.
3. Company may require an Electric Service Agreement or Streetlighting Service Agreement with an additional charge, or special minimum and/or longer initial term for conditions not contemplated herein.
4. All standard lamps will normally be operated by a photo-electric controller to provide service from dusk to dawn (approximately 4,000 hours annually) and will be of the approximate lumen ratings and wattages indicated or requested. Maintenance shall consist of lamp replacement, photo electric controller replacement, lens cleaning, and the like on an as needed basis. Company may charge Customer the cost of abnormal maintenance.
5. Overhead service shall be provided unless the existing local distribution system is underground. Company shall install, own, operate, and/or maintain new underground facilities to serve streetlights. Customer shall provide all trenching and backfilling, and conduit when required to complete the street light installation, for the underground installation, or Customer shall pay the entire cost difference, as a contribution in aid of construction, prior to the start of construction. Customer shall retain ownership of conduit installed when required to complete said installation.

STREETLIGHTING

6. The rates in the monthly bill section shall apply without additional annual charges if a Customer supplies, owns, and maintains a traffic signal installation used with Company's streetlight installation. Company may maintain installations owned wholly or in part by others only under specific terms to be agreed upon.
7. Alternating current, at approximately 60 hertz, at the standard phase and voltage available, shall be supplied to a single location at points on the Company's existing distribution facilities having sufficient capacity.
8. Customer shall reimburse Company the full cost to change the location of or remove any streetlight upon order or resolution of the Governing Body if the streetlight (1) is located on private easement, or (2) has been installed for a period of less than fifteen (15) years, is used solely for the purpose of providing streetlighting for the Customer, and the change in location of said streetlight will not result in an upgrade of the streetlight system.
9. Company shall change the location of or remove any streetlight located on public right-of-way upon order or resolution of the Governing Body if (1) the streetlight has been installed for a period of fifteen (15) years or more, or (2) the removal or change in location of the streetlight is part of an upgrading of the streetlight system. Company may also change the location of any streetlight fixture if the associated pole(s) are used by the Company for other purposes and said pole(s) are being removed or relocated.
10. Service hereunder is subject to the Company's Electric Terms and Conditions as approved Midwest Energy, Inc. Board of Directors.
