
GAS COST OF DELIVERY RIDER

APPLICABILITY

The Gas Cost of Delivery Rider (GCDR) is applicable to all rate schedules for service provided under each of the Company's retail and transportation rate schedules except where not permitted under a separately negotiated contract.

PURPOSE

The purpose of this Rider is to conduct an annual review of natural gas infrastructure investment and expenses in order to adjust rates to reflect the current cost of providing reliable and safe natural gas utility service to the Company's customers.

BASIS OF CHARGE

The Gas Cost of Service (GCS) is the total cost of service for the most recent calendar year. The GCS will be updated annually consistent with the cost of service and revenue requirement models used in the most recent general rate study. The Base GCS is defined as the total cost of service from the most recent general rate study. The difference between the GCS and the Base GCS shall be the Incremental GCS (IGCS). The annual GCS shall not exceed the Base GCS by more than 4.5% compounded annually. The IGCS allocated to each rate class shall be based on the revenue allocated to each rate case as determined in the most recent general rate study. The monthly charge for each rate class shall be calculated by dividing the cumulative IGCS allocated to each rate class by the annual average number of meters in the respective rate class from the most recent calendar year.

MONTHLY CHARGE

The GCS charge shall be a fixed monthly charge and presented as a separate line item on the Customer's bill. The GCS monthly charges are set forth in the Company's Natural Gas Master Tariff.

ANNUAL REVIEW

Each year prior to the effective date of the GCDR charge, Midwest Energy's Board of Directors shall review the GCS for the most recent calendar year.

Issued By: , Chief Executive Officer

Effective Date: January 1, 2025

Approved or Adopted by Midwest Energy, Inc. Board of Directors: November 18, 2024

Index #: 59
Schedule: GCDR
Replacing Schedule: GCSR
Territory: Company Wide

GENERAL RATE STUDY TIMING REQUIREMENT

After a period of no more than 60 months from the approval date of the most recent general rate study the Company is required to receive approval of a new general rate study, or the GCS class monthly charges shall remain at the GCS monthly class charge as effective in the 60th month after the most recently approved general rate study until a new general rate study is approved.

DEFINITIONS AND CONDITIONS

All provisions of this Rider are subject to changes approved by Midwest Energy, Inc. Board of Directors.
