No supplement or separate understanding shall modify the tariff as shown hereon.

Sheet 1 of 4 Sheets

STREET LIGHTING

AVAILABLE

At locations on or adjacent to the Company's existing overhead primary distribution system operating at or below 12 kV. Primary distribution line extensions or extensions from underground facilities may be made to provide service under this schedule in accordance with the Company's Terms and Conditions.

APPLICABLE

To incorporated cities, townships or other local governing bodies for the lighting of public streets, alleys and thoroughfares in urban or platted suburban areas. This rate schedule is not applicable for lighting of any privately owned roads, drives, etc., or for flood lighting installations or to lighting of athletic fields, recreation areas, swimming pools, parking lots and other similar projects either public or private.

EQUIPMENT AND SERVICE PROVIDED

The Company will install, own and operate the following items designated as standard equipment:

1. Standard fixtures will be open or closed (Cobra head) unless otherwise noted. Standard lamps will consist of High Pressure Sodium (HPS), Metal Halide (MH), or Light-Emitting Diode (LED) lamps nominally rated at the wattage and lumens provided for in this rate schedule. Further, the character of the circuit (series or multiple) and the voltages supplied to the fixture will be determined by Company.
2. Standard overhead extensions shall consist of a properly sized pole and arm with a maximum of 165 feet of secondary circuit. Company may restrict installations of new facilities in areas without adequate property right-of-way, utility easements, or areas in which installation would increase costs due to access, terrain, or soil conditions or alternatively the Customer may reimburse the Company the incremental cost above the average cost for a standard installation.
3. Standard underground extensions at the Company's option shall consist of a properly sized pole and arm, secondary cable, pole riser, and a maximum of 330 feet of secondary circuit from the Company's underground distribution system. Company may restrict installations of new facilities in areas without adequate property right-of-way, utility easements, or areas in which installation would increase costs due to access, terrain, or soil conditions or alternatively the Customer may reimburse the Company the incremental cost above the average cost for a standard installation.

STREET LIGHTING

EQUIPMENT AND SERVICE PROVIDED (Continued)

Area Development Street Lights

If the promoter, developer or owner of a new development requests street lighting be installed in the development as contemplated under the Area Development subsection of the Line Extension policy of the Company, the promoter, developer, or owner must first obtain written approval from the governing body responsible for payment of all lighting service charges after installation. The deposit required related to street lighting will include the total estimated installed cost of the fixtures, pole, conductors, conduit, controls, and related equipment. Upon initiation of monthly billing to the governing body for street lighting service, the Company will refund to the promoter, developer, or owner that portion of the deposit not exceeding \$250 per light. However, the portion of the deposit exceeding \$250 per light is not refundable. All terms and charges shall be as specified elsewhere in this schedule and Master Tariff.

MONTHLY BILL

Charges equivalent to rates in the currently effective Master Tariff, plus applicable adjustments and surcharges including the Energy Cost Adjustment (ECA), Ad Valorem Tax (AVE), and Transmission Delivery Charge (TDC).

DEFINITIONS AND CONDITIONS

1. Standard fixtures available for installation hereunder shall be determined by the Company on the basis of their quality, capital and maintenance costs, long term availability, general Customer acceptance and other factors.
2. Nonstandard street lighting will be installed at the Company's option and is referenced in Schedule SSL.

STREET LIGHTING

DEFINITIONS AND CONDITIONS (Continued)

3. Company may require an Electric Service Agreement or Street Lighting Service Agreement with an additional charge, or special minimum and/or longer initial term for conditions not contemplated herein.
4. Company shall install, own, operate and maintain the complete installation, consisting of a lamp, fixture, bracket, secondary cable, and pole. All lamps will normally be operated by a photo-electric controller to provide service from dusk to dawn (approximately 4,000 hours annually) and will be of the approximate lumen ratings and wattages indicated or requested. Maintenance shall consist of lamp replacement, photo electric controller replacement, lens cleaning and the like on an as needed basis. Company may charge Customer the cost of abnormal maintenance.
5. Overhead service shall be provided unless the existing local distribution system is underground. Company shall install, own, operate and/or maintain new underground facilities to serve street lights. Customer shall provide all trenching and backfilling, and conduit when required to complete the street light installation, for the underground installation or Customer shall pay the entire cost difference, as a contribution in aid of construction, prior to the start of construction. Customer shall retain ownership of conduit installed when required to complete said installation.
6. New installations supplied shall use HPS, MH, or LED lamps. Mercury vapor fixtures and lamps are no longer available for new installations or maintenance.
7. The rates in the monthly bill section shall apply without additional annual charges if a Customer supplies, owns, and maintains a traffic signal installation used with Company's street light installation. Company may maintain installations owned wholly or in part by others only under specific terms to be agreed upon.
8. Alternating current, at approximately 60 hertz, at the standard phase and voltage available, shall be supplied to a single location at points on the Company's existing distribution facilities having sufficient capacity.

STREET LIGHTING

DEFINITIONS AND CONDITIONS (Continued)

9. Customer shall reimburse Company the full cost to change the location of or remove any street light upon order or resolution of the Governing Body if the street light (1) is located on private easement, or (2) has been installed for a period of less than fifteen (15) years, is used solely for the purpose of providing street lighting for the Customer, and the change in location of said street light will not result in an upgrade of the street light system.

10. Company shall change the location of or remove any street light located on public right-of-way upon order or resolution of the Governing Body if (1) the street light has been installed for a period of fifteen (15) years or more, or (2) the removal or change in location of the street light is part of an upgrading of the street light system. Company may also change the location of any street light fixture if the associated pole(s) are used by the Company for other purposes and said pole(s) are being removed or relocated.

11. Service hereunder is subject to the Company's Electric Terms and Conditions as approved Midwest Energy, Inc. Board of Directors.
