1	Electric Fixed Delivery Charge		$28.00	
2	Electric Energy Charge		$71.89	
3	Energy Delivery Charge		$12.14	
4	ECA per kWh	$0.005 CR	$8.30	CR
5	Delivery Demand Charge		$7.36	
6	Generation Demand Charge		$10.89	
7	Transmission Delivery Charge		$30.77	
	Total Electric - Residential		**$152.75**	

❶ **Electric Fixed Delivery Charge** covers the fixed cost of maintaining access to the electric grid, including infrastructure, metering, billing, customer support, and other system costs that do not vary with energy consumption.

❷ **Electric Energy Charge** is the portion of your bill that changes with how much electricity you use. This charge recovers the costs associated with generating or purchasing electricity and delivering that energy.

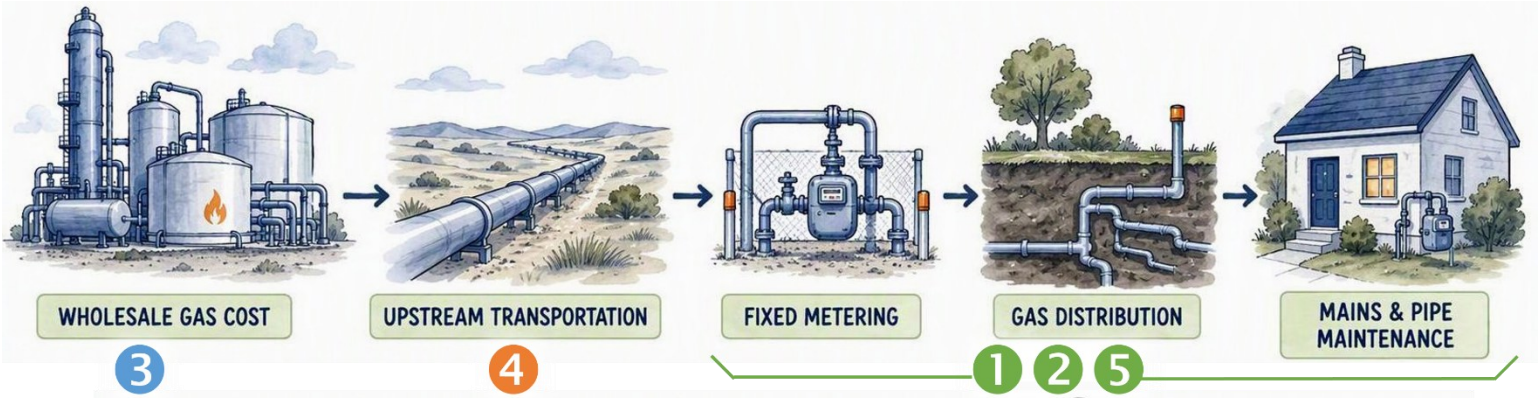

❸ **Energy Delivery Charge** helps pay for the equipment and services needed to safely and reliably deliver electricity from the grid to your location.

❹ **Energy Cost Adjustment (ECA)** is a variable charge that adjusts for changes in fuel and purchased power costs and may increase or decrease each quarter.

❺ **Delivery Demand Charge** is a charge based on the highest amount of electricity you use at one time. It supports the equipment and infrastructure needed to meet your peak power needs whenever they occur.

❻ **Generation Demand Charge** helps pay for the power plants and other generation resources that must be available to reliably serve your peak energy needs.

❼ **Transmission Delivery Charge** helps pay for the high-voltage power lines and substations that transport electricity across the grid to your community.

GRES	10000694	2/4/2026	3/5/2026	29	8186	8328	1.0050	143

1 Gas Fixed Delivery Charge			$19.00
2 Gas Delivery Charge			$28.50
3 Cost of Gas Commodity	per Therm	$0.48084	$68.76
4 Gas Capacity Delivery Charge	per Therm	$0.20972	$29.99
5 Gas Cost of Delivery Rider			$1.74
Total Gas - Residential			**$147.99**

❶ **Gas Fixed Delivery Charge** → Keeps your account connected and covers customer service, metering, billing, and administrative costs.

❷ **Gas Delivery Charge** → Pays for operating and maintaining the local gas distribution system.

❸ **Cost of Gas Commodity** → Pays for the natural gas you use.

❹ **Gas Capacity Delivery Charge** → Pays for transporting natural gas to Midwest Energy's system and ensuring supply is available when needed.

❺ **Gas Cost of Delivery Rider** → Pays for ongoing infrastructure improvements and safety investments.

Think of it this way - your natural gas bill covers three main things: the natural gas itself, the infrastructure used in delivery of that gas to your home or business, and the ongoing operation, maintenance, and customer services needed to provide safe, reliable service year-round.
