★Types SM and SML Power Fuses are manufactured in accordance with a quality system certified to ISO 9002.

Standard

The seller's standard conditions of sale set forth in Price Sheet 150 apply, except as modified under the "Warranty Qualifications" section page 4.

Special to This Product

Note: S&C Type SM and SML Power Fuses are available separately only when the ultimate user is an electric utility (investor-owned, municipal, federal, state, county, or RUS-financed cooperative) or other qualified power user. These fuses are available to other users in the form of S&C Custom Metal-Enclosed Switchgear; please refer to the nearest S&C Sales Office. Type SM and SML Power Fuses are also available separately to qualified original-equipment manufacturers for subsequent installation in metal enclosures in accordance with S&C's applicable minimum construction specifications, as set forth under the "Warranty Qualifications" section on page 4.

Inclusions

Complete mountings include a base, Cypoxy™ Insulators, and fuse live parts. Complete mountings are factory-assembled and adjusted and ready for installation.

SM-4Z, SM-5S, SM-5SS, and SM-20 Power Fuses:

SM-4Z and SM-5S Power Fuses are offered in both the disconnect and non-disconnect styles, SM-5SS Power Fuses in the non-disconnect style only, and SM-20 Power Fuses in the disconnect style only. These power fuses (in either style) consist of three distinct components: a fuse mounting, a holder (SM-4Z, SM-5S, and SM-5SS Power Fuses) or fuse unit end-fittings including silencer (SM-20 Power Fuses), and a refill unit (SM-4Z, SM-5S, and SM-5SS Power Fuses) or fuse unit (SM-20 Power Fuses). Each component is ordered separately as described on page 5 and page 6 in the "How to Order" section.

These power fuses are not designed for live-switching duties.

SML-20 and SML-4Z Power Fuses: These power fuses are available in the disconnect style only. The SML-20 Power Fuse consists of three distinct components: a fuse mounting, including a Uni-Rupter® Interrupter and the same base as the SM-20 Power Fuse; fuse unit end-fittings (including silencer) identical to those for the SM-20 Power Fuse; and the same SMU-20® Fuse Unit used with the SM-20 Power Fuse.

The SML-4Z Power Fuse consists of three distinct components: a fuse mounting, including a Uni-Rupter Interrupter and the same base as the SM-20 and SML-20 Power Fuses; a fuse holder similar to the SM-4Z Holder, except for the provision of contacts used to operate Uni-Rupter Interrupter; and the same SM-4® Refill Unit used with SM-4Z Power Fuses. (SM-4Z Holders are not interchangeable with SML-4Z Holders in the same mounting.)

Components for Type SML Power Fuses are ordered separately, as described on page 5 and page 6 in the "How to Order" section.

SML-20 and SML-4Z Power Fuse Mountings with Uni-Rupter Interrupters provide 200-ampere single-pole live switching of single-phase and three-phase circuits (on systems where line-to-line voltage does not exceed 27 kV).

Exclusions

Complete mountings and live parts do not include holders, fuse unit end-fittings, refill units, or fuse units.

Complete mountings and live parts do not include connectors. Various connectors are available as listed in Table 7 on page 17. Specify quantity and catalog number of connectors desired.

Specification Deviations

SM-4Z, SM-5S, SM-5SS, and SM-20 Power Fuses:

- Mountings for these power fuses can be supplied without insulators. Add suffix "-Z1" to the catalog number.
- Mountings for these power fuses can be supplied less bases but with insulators. Add suffix "-Z4" to the catalog number.
- These mountings cannot be supplied for back connection.
- Live parts for these power fuses can be purchased separately. See Table 1 on page 7 through Table 3 on page 9.
- When these mountings are to be provided with special connectors, consult the nearest S&C Sales Office for availability.

- Mountings can be supplied with tin-plated terminal pads. To specify, add suffix “-Z5” to the catalog number. Not applicable to SM-20 Power Fuses, which are equipped with tin-plated terminal pads as a standard feature. Disconnect-style parallel SM-5S Power Fuses are furnished with aluminum terminal pads as a standard feature.

SML-4Z and SML-20 Power Fuses:

- Mountings for these power fuses cannot be supplied without insulators.
- Mountings for these power fuses cannot be supplied without bases but with insulators.
- These mountings cannot be supplied for back connection.
- Live parts for these power fuses cannot be purchased separately.
- When these mountings are to be provided with special connectors, consult your nearest S&C Sales Office for availability.

Application Notes

For SML-4Z and SML-20 Power Fuses only, S&C Power Fuses with Uni-Rupter Interrupters are designed for the following single-pole live-switching duties in single-phase or three-phase circuits of distribution systems rated 14.4 kV or 25 kV:

Live Switching—Opening

- **Transformer switching**—Transformer load currents up through 200 amperes, as well as transformer magnetizing currents associated with the applicable loads
- **Line-switching**—Load splitting (parallel or loop switching) and load dropping of currents up through 200 amperes; also line dropping (charging currents typical for distribution systems of these voltage ratings)
- **Cable switching**—Load splitting (parallel or loop switching) and load dropping of currents up through 200 amperes; also cable dropping (charging currents typical for distribution systems of these voltage ratings)

● These values represent the fault-closing capabilities of the fuse with a Uni-Rupter Interrupter when the fuse is closed with a purposeful thrust without hesitation. The values are the available fault currents into which the fuse can be closed the specified number of times (once or twice), with the Uni-Rupter Interrupter remaining operable and able to carry and interrupt rated current.

Live Switching—Closing

- **Circuit closing**—Inrush currents associated with the above opening duties
- **Duty-cycle fault closing**●—One-time capability equal to the interrupting rating of the fuse (in amperes RMS asymmetrical):
 - For the SML-20—22,400 at 14.4 kV, 20,000 at 25 kV
 - For the SML-4Z—20,000 at 14.4 kV, 15,000■ at 25 kV

And two-time capability of 13,000 amperes RMS asymmetrical at 14.4 kV and 25 kV.

A Note on Single-Pole Switching

In single-pole switching of ungrounded-primary three-phase transformers or banks (or single-phase transformers connected line to line), circuit connections or parameters may, in some cases, produce excessive overvoltages. In particular, for the following applications above 22 kV, single-pole switching by any means—including with a Uni-Rupter Interrupter—should be performed only under the conditions stated in italics:

- Switching unloaded or lightly loaded delta-connected or ungrounded-primary wye-wye connected three-phase transformers or banks (or line-to-line connected single-phase transformers), rated 150 kVA or less three-phase, or 50 kVA or less single-phase—or of any kVA when combined with unloaded cables or lines—where maximum system operating voltage exceeds 22 kV (*Single-pole switching should be performed only if each phase is carrying 5% load or more, or if the transformer or bank is temporarily grounded at the primary neutral during switching.*)
- Switching loaded or unloaded ungrounded-primary wye-delta connected three-phase transformers or banks—alone or combined with unloaded cables or lines—where maximum system operating voltage exceeds 22 kV (*Single-pole switching should be performed only if each phase is carrying 5% load or more and if the lighting-load phase is always switched open first [or switched closed last], or if the transformer or bank is temporarily grounded at the primary neutral during switching.*)

■ 20,000 amperes RMS asymmetrical when applied on solidly grounded-neutral systems only with fuses connected by single-conductor, concentric-neutral type cable (or directly coupled) to a transformer or transformers.

Warranty Qualifications

For the standard warranty contained in the seller’s standard conditions of sale (as set forth in Price Sheet 150) to apply to Types SM-4Z, SML-4Z, SM-5S, SM-5SS, and SM-20 Power Fuses, or the SML-20 Power Fuse when installed in indoor, outdoor, or indoor-outdoor enclosures of other-than-S&C manufacture, the enclosures must be constructed in accordance with S&C’s applicable minimum construction specifications to be found in the current revision of one of the following publications:

INFORMATION BULLETIN 252-62:

S&C Type SM Power Fuses Indoor Distribution (4.16 kV through 34.5 kV)	Minimum Construction Specifications for Indoor and Outdoor Metal Enclosures With Fuses
---	--

INFORMATION BULLETIN 252-64:

S&C Type SML Power Fuses Indoor Distribution (13.8 kV and 25 kV)	Minimum Construction Specifications for Indoor and Outdoor Metal Enclosures With Fuses
--	--

INFORMATION BULLETIN 792-60:

S&C Alduti-Rupter® Switches With Power Fuses Indoor Distribution (4.8 kV and 13.8 kV)	Minimum Construction Specifications For Metal Enclosures—Indoor and Outdoor
--	---

INFORMATION BULLETIN 795-60:

S&C Mini-Rupter® Switches With Power Fuses Indoor Distribution (4.8 kV and 14.4 kV)	Minimum Construction Specifications for Metal Enclosures—Indoor and Outdoor
--	---

For the standard warranty contained in the seller’s standard conditions of sale (as set forth in Price Sheet 150) to apply to live parts when purchased separately, the live parts must be assembled on mountings in accordance with instructions to be found in the present version of one of the following publications:

INSTRUCTION SHEET 252-505:

S&C Type SM-4Z and SM-5S Power Fuses Indoor Distribution	Live Parts for Disconnect Style
---	---------------------------------

INSTRUCTION SHEET 252-510:

Types SM-4Z, SM-5S, and SM-5SS Power Fuses Indoor Distribution	Live Parts for Non-Disconnect Style
---	-------------------------------------

INSTRUCTION SHEET 252-535:

S&C Type SM-20 Power Fuses Indoor Distribution	Live Parts for Disconnect Style
---	---------------------------------

With respect to Type SM or SML Power Fuses, when installed in submersible enclosures of other-than-S&C manufacture, the warranty does not apply unless enclosures are furnished by an approved supplier and are of watertight construction providing proper electrical clearances and proper space for fuse handling.

The standard warranty contained in the seller’s standard conditions of sale (as set forth in Price Sheet 150) does not apply when fuses of other-than-S&C manufacture are used in S&C SM or SML Mountings or when S&C Holders, Refill Units, or Fuse Units are used in mountings of other than S&C manufacture.

Types SM-20 and SML-20 Power Fuses

Complete the following steps to create completed catalog numbers for orders of Types SM-20 and SML-20 Power Fuses:

STEP 1. Obtain the catalog number of the desired mounting from the “Mounting” column in Table 1 on page 7 through Table 3 on page 9. If only live parts are desired, use the “Live Parts” column.

Note: Live parts for SML-20 Power Fuses cannot be purchased separately.

Catalog Number:

STEP 2. Obtain the catalog number of the applicable fuse unit end fittings from the same table used to select the mounting.

Catalog Number:

STEP 3. Obtain the catalog number of the applicable fuse unit from Table 4 on page 10 through 12, making sure to match the voltage rating of the fuse unit to that of the mounting.

Catalog Number:

STEP 4. Obtain the catalog number of the desired connector from Table 7 on page 17. Order two connectors for each mounting or set of live parts.

Catalog Number:

Catalog Number:

Note: Parts, insulating barrier assemblies, and switch blades listed in Table 8 on page 18 through Table 11 on page 19 are ordered using the method outlined above.

Example 1: The catalog number for a Disconnect 45° Opening Silencer, vertical style, 25-kV SM-20 Mounting is:

Example 2: The catalog number for live parts only for a Disconnect 45° Opening Silencer, vertical style, 25-kV SM-20 Mounting is:

Example 3: The catalog number for fuse unit end-fittings for use with Disconnect 45° Opening Silencer, vertical style, 25-kV SM-20 Mounting is:

Example 4: The catalog number for a 25 kV, K Speed SMU-20 Fuse Unit rated 25K continuous is:

Example 5: The catalog number for connectors accommodating No. 2 solid (33.6 mm²) copper through 500 kc mil (335 mm²)-stranded copper or aluminum for the mounting selected in Step 1 is:

Two connectors must be ordered for the mounting.

How to Order Handling Tools

Obtain the catalog number(s) of recommended handling tool(s) from Table 12 on page 19. Refer to S&C Specification Bulletin 851-31.

① These mountings cannot be supplied for back connection.

② Includes silencer.

③ Includes silencer (SM-4Z) or snuffler (SM-5S).

④ Symmetrical ratings assigned are based on available short-circuit current at locations where the X/R ratio is 15. The interrupting ratings expressed in amperes RMS asymmetrical are 1.6 times the symmetrical ratings listed. Higher symmetrical ratings have been determined for these fuses where X/R = 10 and X/R = 5. These higher ratings as well as asymmetrical ratings are given in S&C Descriptive Bulletin 252-30.

● Rating is 12,500 amperes RMS symmetrical when applied on solidly grounded-neutral systems only with fuses connected by single-conductor, concentric-neutral type cable (or directly coupled) to a transformer or transformers.

■ Supersedes 34.5-kV, 150-kV BIL SM-4 Mounting catalog number 187634 and 34.5-kV, 200-kV BIL SM-4 Mounting catalog number 187534R1.

▲ Rated 7.2 kV nominal, for use in listed 4.8-kV mountings for system voltages through 4.8 kV or in discontinued 7.2-kV mountings for system voltages through 7.2 kV.

◆ Rated 14.4 kV nominal, for use in listed 13.8-kV mountings or in discontinued 14.4-kV mountings.

▼ Applies to 7.2-kV refill unit in 7.2-kV holder for 4.8-kV system voltage only. Rating is 37,500 amperes RMS symmetrical for 4.16-kV refill unit in 7.2-kV holder for system voltages through 4.16 kV.

□ Two holders required with each mounting.

▽ Supersedes 34.5-kV, 150-kV BIL SM-5 Mounting catalog number 187644 and 34.5-kV, 200-kV BIL SM-5 Mounting catalog number 187544R2.

Table 2. SML Power Fuses—Disconnect Style—Less Connectors and Less Refill Units or Fuse Units

Style	Fuse Type	Rating						Mounting ^① (including Live Parts, Less Fuse Unit End-Fittings or Holder)		Fuse Unit End Fittings ^② (SML-20) or Holder ^② (SML-4Z)		Page Reference for Dimensional Information

	SML-4Z	13.8	17.0	95	200	200	12 500	SML-4	90322	SML-4Z	92352■	25
		25	27	125	200	200	9 400●	SML-4	90323	SML-4Z	92353	25

① These mountings cannot be supplied for back connection.

② Includes silencer.

③ The Uni-Rupter Interrupter associated with these fuses can carry and interrupt load current up to and including the emergency peak-load capabilities of the fuses. Furthermore, the fuse with a Uni-Rupter Interrupter has a one-time duty-cycle fault-closing capability equal to the interrupting rating of the fuse (expressed in amperes RMS asymmetrical), and a two-time duty-cycle fault-closing capability of 13,000 amperes RMS asymmetrical. The duty-cycle fault-closing capability defines the level of available fault current into which the fuse can be closed the specified number of times (once or twice), without quick-make mechanism and when operated vigorously through its full travel without hesitation at any point, with the Uni-Rupter Interrupter remaining operable and able to carry and interrupt current up to the emergency peak-load capabilities of the fuse.

④ Symmetrical ratings assigned are based on available short-circuit current at locations where the X/R ratio is 15. The interrupting ratings expressed in amperes RMS asymmetrical are 1.6 times the symmetrical ratings listed. Higher symmetrical ratings have been determined for these fuses where X/R = 10 and X/R = 5. These higher ratings as well as asymmetrical ratings are given in S&C Descriptive Bulletin 252-30.

● Rating is 12,500 amperes RMS symmetrical when applied on solidly grounded-neutral systems only with fuses connected by single-conductor, concentric-neutral type cable (or directly coupled) to a transformer or transformers.

■ Rated 14.4 kV nominal, for use in listed 13.8-kV mountings.

Table 3. SM Power Fuses—Non-Disconnect Style—Less Connectors and Less Refill Units

① These mountings cannot be supplied for back connection.

② Includes silencer (SM-4Z), snuffler (SM-5S), or super snuffler (SM-5SS).

③ Symmetrical ratings assigned are based on available short-circuit current at locations where the X/R ratio is 15. The interrupting ratings expressed in amperes RMS asymmetrical are 1.6 times the symmetrical ratings listed. Higher symmetrical ratings have been determined for these fuses where $X/R = 10$ and $X/R = 5$. These higher ratings as well as asymmetrical ratings are given in S&C Descriptive Bulletin 252-30.

● Rating is 12,500 amperes RMS symmetrical when applied on solidly grounded-neutral systems only with fuses connected by single-conductor, concentric-neutral type cable (or directly coupled) to a transformer or transformers.

■ Supersedes 34.5-kV, 150-kV BIL SM-4 Mounting catalog number 190034 and 34.5-kV, 200-kV BIL SM-4 Mounting catalog number 190304R1.

▲ Rated 7.2 kV nominal, for use in listed 4.8-kV mountings for system voltages through 4.8 kV, or in discontinued 7.2-kV mountings for system voltages through 7.2 kV.

◆ Rated 14.4 kV nominal, for use in listed 13.8-kV mountings or in discontinued 14.4-kV mountings.

▼ Applies to 7.2-kV refill unit in 7.2-kV holder for 4.8-kV system voltage only. Rating is 37,500 amperes RMS symmetrical for 4.16-kV refill unit in 7.2-kV holder for system voltages through 4.16 kV.

□ Supersedes 34.5-kV, 150-kV BIL SM-5 Mounting catalog number 190044 and 34.5-kV, 200-kV BIL SM-5 Mounting catalog number 190404R2.

△ 60-Hertz only.

① These fuse units are equally suitable for use in SMD-20 Outdoor Distribution Mountings.

② These fuse units are equally suitable for use with SME-20 Fuse Unit end-fittings listed in S&C Specification Bulletin 665-31, “S&C Manual

PME Pad-Mounted Gear” and S&C Specification Bulletin 666-31, “S&C Remote Supervisory PME Pad-Mounted Gear.”

③ Also suitable for protection of single-phase-to-neutral circuits (lines or transformers) on 20/34.5 GrY-kV systems.

● This fuse unit is not “E” rated.

① Rated 7.2 kV nominal, for use in SM-4 Holders rated 7.2 kV when applied in listed mountings rated 4.8 kV or in discontinued mountings rated 7.2 kV.

② These refill units are also suitable for use with SME-4Z Holders listed in S&C Specification Bulletin 665-31, "S&C Manual PME Pad-Mounted Gear," and S&C Specification Bulletin 666-31, "S&C Remote Supervisory PME Pad-Mounted Gear."

③ Rated 14.4 kV nominal, for use in SM-4 Holders rated 14.4 kV when applied in listed mountings rated 13.8 kV or in discontinued mountings rated 14.4 kV.

● This S&C Coordinating Speed refill unit should be applied where the maximum continuous load current does not exceed 200 amperes and where all fault currents below 1,000 amperes will be cleared by another fuse.

① Rated 4.16 kV nominal, for use in SM-5 Holders rated 7.2 kV when applied in listed mountings rated 4.8 kV for system voltages through 4.16 kV.

② Rated 7.2 kV nominal, for use in SM-5 Holders rated 7.2 kV when applied in listed mountings rated 4.8 kV for 4.8-kV system voltage only, or in discontinued mountings rated 7.2 kV for system voltages of 4.8 kV through 7.2 kV.

● Catalog numbers are in italics because these are 7.2-kV refill units. Interrupting ratings are those listed in S&C Descriptive Bulletin 252-30 for 7.2-kV SM-5S Power Fuses applied to systems rated 2.4/4.16 Y kV.

■ These S&C Coordinating Speed refill units should be applied where the maximum continuous load current does not exceed 400 amperes and where all fault currents below 3,000 amperes for catalog numbers 381410R4 and 382410R4 and 4,000 amperes for catalog numbers 381420R4 and 382420R4 will be cleared by another fuse.

● For use only in holders carrying an arrow-shaped nameplate. Spring-and-cable assemblies for holders that do not carry an arrow-shaped nameplate are no longer available, so a new holder with the appropriate voltage rating must be ordered.

■ Product discontinued. To replace an SM-4S Snuffler (catalog number FA-104328), order one SM-4Z Silencer as listed, plus one fuse pivot, catalog number S-83670.

▲ Not usable in disconnect style mounting.

① Includes four 3/16-inch (4.8-mm) NEMA Grade GPO3 fiberglass-reinforced polyester barriers, plus a complete set of mounting hardware and adjustable-length interbarrier spacers.

② Replacement NEMA Grade GPO3 fiberglass-reinforced polyester barriers listed in this specification bulletin must only be installed with barriers of similar design and construction.

③ Includes one 3/16-inch (4.8-mm) NEMA Grade GPO3 fiberglass-reinforced polyester barrier; does not include mounting hardware or interbarrier spacers. For mounting hardware sufficient to mount one barrier, specify two fastener assemblies, catalog number CA-600. For interbarrier spacers, refer to the nearest S&C Sales Office.

Table 11. Switch Blades^①

Item	Rating			Catalog Number

Switch blades, for use in lieu of SM-5S Holders in SM-5 Mountings	7.2	7.2	400	5421
	14.4	17	400	5422
	25	27	300	5423
	34.5	38	300	5424

① When switch blades are used in lieu of SML-4Z Holders or SMU-20 Fuse Units, the Uni-Rupter Interrupter associated with these switches can carry and interrupt load currents up to and including the emergency peak-load capabilities of the fuses. Furthermore, the switches with the Uni-Rupter Interrupter have a one-time duty-cycle fault-closing capability equal to the interrupting ratings of the fuses (expressed in amperes RMS asymmetrical) and a two-time duty-cycle fault-closing capability of 13,000 amperes RMS asymmetrical. The duty-cycle fault-closing capability defines the level of available fault current into which the switch can be closed the specified number of times (once or twice), without quick-

make mechanism and when operated vigorously through its full travel without hesitation at any point, with the Uni-Rupter Interrupter remaining operable and able to carry and interrupt currents up to the emergency peak-load capabilities of the fuse.

For 14.4-kV switches with Uni-Rupter Interrupters, the one-second rating is 14,000 amperes RMS symmetrical. For 25-kV switches with Uni-Rupter Interrupters, the one-second rating is 12,500 amperes RMS symmetrical.

The momentary ratings of the switches equal or exceed the interrupting ratings of the fuses.
